

# RECYCLE YOUR CELL PHONE to help save okapis in the wild.

For more information, visit:  
[www.houstonzoo.org/actionforapes](http://www.houstonzoo.org/actionforapes)

Handheld electronic devices like cell phones contain a material called tantalum. Tantalum comes from coltan, a metallic ore that is destructively mined in okapi habitats in the African Congo.

**You can help by recycling your everyday handheld devices, such as cell phones and tablets.**
