

# **RECYCLE YOUR CELL PHONE** to help save okapis in the wild.

For more information, visit:  
[www.houstonzoo.org/actionforapes](http://www.houstonzoo.org/actionforapes)

## **Join the Houston Zoo's Action for Apes Challenge**

**February 1 – April 30**

Handheld electronic devices like cell phones contain a material called tantalum. Tantalum comes from coltan, a metallic ore that is destructively mined in okapi habitats in the African Congo.

**You can help by recycling your everyday  
handheld devices, such as cell phones  
and tablets.**
